

This word document contains links to games for practising 'rapid recall' skills, such as times tables and number bonds.

The Key Stage 2 skills are arranged in a 'ladder' and levels (Bronze, Silver etc. This relates to the school Maths Club system, not directly to any year group.) Children in Year 3 would be able to start on Bronze level and progress at their own rate of working.

The games are all used in school but are hosted on external sites which sometimes contain adverts. No inappropriate content has ever been noted on any of these sites and they are all sites aimed at children of primary school age. However, as the school has no control over external content, parents are, as always, advised to monitor the websites their child is accessing.
